PROFESSIONAL SUMMARY

Computer Science graduate with strong knowledge of Python programming, SQL, and software development fundamentals. Familiar with Linux environments, debugging, problem-solving, and application development. Seeking opportunities to contribute technical and analytical skills in a software support or development role.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML, CSS, React.js, C++ (currently learning — DSA focus)

Software Development: Object-Oriented Programming (OOP), SDLC, Data Structures

Operating System: Linux, Windows

Frameworks & Libraries: Scikit-learn, Fast API, Pandas, NumPy, Matplotlib

Database: Oracle SQL, PostgreSQL

Tools & Platforms: Git, GitHub, Linux Commands, VS Code, Google Colab, CSV Data Processing

Soft Skills: Problem-Solving, Team Collaboration, Adaptability, Quick Learning, Presentation, Attention to Detail

PROJECTS

CureConnect – A Medicine Recommendation System | Academic Project | Bangalore 2026

Designed and developed an AI-powered healthcare web application following complete SDLC phases — requirements analysis, design, implementation, testing, and deployment

- Implemented machine learning models to recommend medicines based on user symptoms and health conditions; validated prediction results and handled edge cases for reliability
- Integrated an intelligent chatbot to provide basic health guidance and improve user interaction; performed functional testing to ensure response accuracy
- Built location-based services to identify nearby medical stores and support medicine availability checks; conducted integration testing for seamless functionality
- Technologies: Python, Flask, Scikit-learn, Machine Learning, JavaScript, HTML, CSS

Project-Link: - <https://cure-connect-three.vercel.app/>

Trading Bot – An AI Model Which Can Handle Time Series Data | Bangalore 2025

Developed an AI-powered trading system capable of analyzing financial time-series data and generating market insights for decision-making

- Collected, processed, and cleaned historical market datasets; applied data validation techniques to ensure data quality and consistency
- Implemented machine learning algorithms for trend prediction and pattern analysis; evaluated model performance using historical data
- Designed and implemented visual dashboards using charting libraries to present trading insights; conducted functional testing to verify output accuracy
- Technologies: Python, Pandas, NumPy, Scikit-learn, Time Series Analysis, Data Visualization

Project-Link: - <https://trading-bot-frontend-dashboard.vercel.app/>

EDUCATION

Bachelor of Engineering – Computer Science Engineering 2022 – 2026

Dr. Sri Sri Sri Shivakumar Mahaswamy College of Engineering, Bangalore | **CGPA: 9.0 / 10**

Pre-University Course – Science (PCMB) 2020 – 2022

Susheela Y Kulgod PU College, Ramdurg | **Score: 83.45%**

Secondary School Leaving Certificate (SSLC) 2020

Vidya Prasarak Samiti's English Medium High School, Ramdurg | **Score: 87%**
